Allowable Subject Matter

1. Claims 1-18, 20-30 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The prior art taken singly or in combination does not teach or suggest, a method for managing a set of memory resources used to store texture objects, among other things, comprising:

responsive to the halting step, selectively removing stored texture objects in a second memory if an inability to allocate sufficient memory to the current texture object is present (claims 1, 15, 20, and 30) .

calling a memory allocation unit to allocate memory to the current texture object after the stored texture object is removed (claim 11).

The closest prior art, reference Gannett (U.S. Patent No. 5,790,130) teaches a method of allocating memory for texture data including removing texture data that are not currently used in a shared system memory and its corresponding texture data in local memory based on the priority and history of use. Reference Sethi et al. (U.S. Patent No. 6,600,493) teaches a method for allocating memory for a request of graphics application wherein if there is not sufficient available graphics memory, a process allocates available portions of system memory to make up for the deficit amount of graphics memory.

However, references Gannett and Sethi et al. do not teach removal of a texture object from the second memory resource responsive to a halting step of repeated allocating and

selective removal with respect to the first memory resource, and calling a memory allocation unit after a stored texture object is removed.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
